

Victorien THOMAS

Aerospace Engineering Student
Engineering Degree in Aeronautics and
Space Systems – Year 4

EXPERIENCE

European Space Agency (ESA)

Internship – 6 weeks – 2024

Contributed to the 3D modeling of the Orbital Propellant Depot (OPD) project. Designed and developed digital representations of system components within a space engineering context. Worked independently and collaboratively within a technical team.

Schneider Electric

Student Job – 1 month – 2023

Gained experience in an industrial production environment. Contributed to quality control operations within a team setting, with strong attention to organization and process compliance.

Association Management

Association – Treasurer – 2023–Present

Managed the association's financial operations and budget monitoring. Contributed to team coordination and activity organization. Developed skills in project management, communication, and collaborative work.

SKILLS

3D Modelling

Proficient in Blender and CATIA V5 for 3D modeling and the design of mechanical components and technical infrastructures.

- *Modelling of an airport using Blender*
- *Design of an Orbital Propellant Depot using Blender*
- *Design of a Formula 1 chassis and an aircraft control pedal using CATIA V5*

Programming

Programming & Modeling: Python, C/C++, Arduino, MATLAB / Simulink, VHDL

EDUCATION

IPSA Paris

Engineering Degree in Aeronautics
and Space Systems – Year 4

LANGUAGES

- French – native
- English – B2 (830 TOEIC)
- Spanish – B2 (6 months in Colombia)

SKILLS

- CATIA V5
- Blender
- Python
- MATLAB
